

example of a 3-dimensional
designspace for [wght], [wdth] and [opsz]

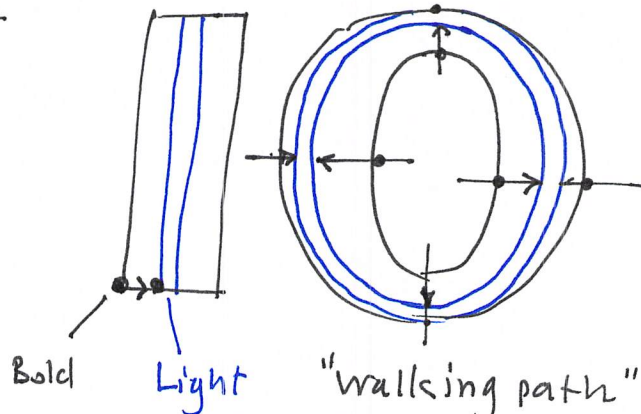

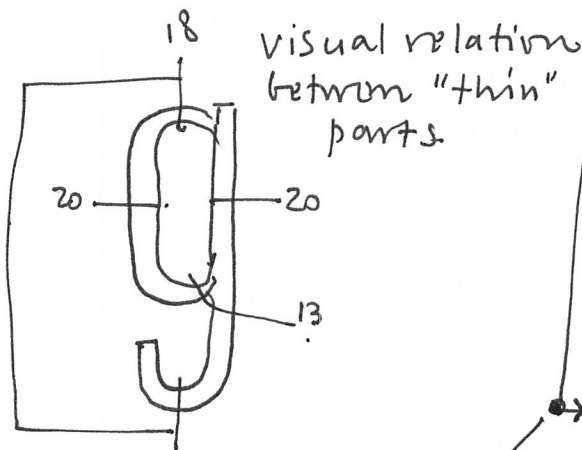

Designspace file defines
XML • designspace

axes
master
locations

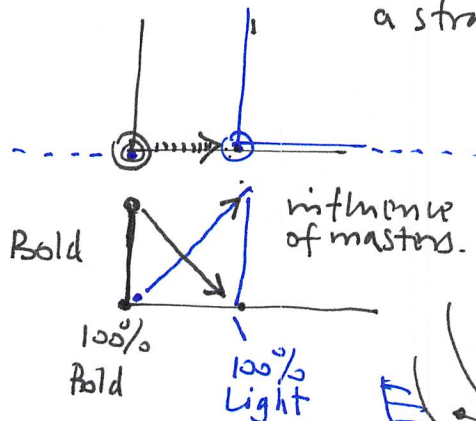

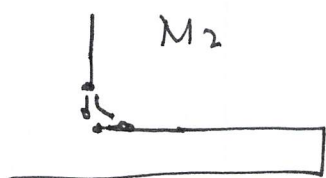

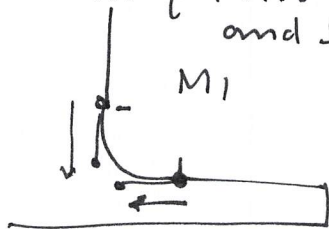

Using H stem width as
parameters for the weight
axis (extreme and default)

"walking path" of
points interpolation is
a straight line.

If points move
in straight lines
interpolation is easy
and safe.

influence
of masters.

inflection points
move in non-
proportio-
nal way.

for angled
lines (s-inflection)
points can break the lines.
